SUMMARY

Business Information Systems graduate (GPA 4.00) with hands-on experience in web application development, database modeling, and business workflow optimization. Experienced in building Next.js and Laravel web applications, configuring AI-assisted automation workflows, and translating operational requirements into reliable digital systems. Proven ability to collaborate within Agile teams, coordinate cross-functional logistics, and structure complex operational data into clear, maintainable processes. Currently pursuing a long-term remote individual-contributor role focused on technology, systems, and business operations.

COMPETENCIES

- **Web & Application Development:** JavaScript (ES6+), Next.js, React.js, PHP, Laravel, HTML5, CSS3, Tailwind CSS, Python, C#, RESTful APIs, and responsive design.
- **Data & Systems Architecture:** MySQL, relational database modeling, schema normalization, CRUD operations, spreadsheet-based data reconciliation, and operational reporting.
- **AI & Workflow Automation:** LLM prompt engineering, AI-assisted workflow configuration, n8n (basic workflows), and structured note/data summarization.
- **Tools & Methodologies:** Git/GitHub, Docker (basic), Notion, Trello, Figma, Agile/Scrum collaboration, systems documentation, and partner onboarding.

PROFESSIONAL EXPERIENCE

PT Karya Buah Tropis (Gudang Buah Beku) | Surabaya, Indonesia

Director — Operations & Digital Systems | July 2020 – Present (Currently part-time advisory)

Small family-owned frozen-fruit distribution business

- Managed end-to-end stock recording and sales invoicing workflows to support daily commercial frozen fruit distribution.
- Developed and maintained the company website and digital B2B catalog covering 90+ SKUs, helping secure 5 regular commercial clients within 3 months of launch.
- Translated operational logistics and inventory handling requirements into standardized SOPs and structured spreadsheet tracking templates.
- Designed product branding, vacuum packaging, and digital marketing assets, contributing to improved brand presence and customer inquiries.
- Coordinated operational and delivery requirements across suppliers, customers, and internal staff to maintain reliable order fulfillment.

PT Kolaborasi Kerja Indonesia (Enevti) | Jakarta, Indonesia (Remote)

Partnerships Specialist Intern | January 2022 – April 2022

- Conducted thorough prospect research and data profiling to build an organized partner database, successfully onboarding 15+ brand ambassadors.
- Collaborated within an Agile/Scrum cross-functional team and supported recurring sprint activities.
- Streamlined the ambassador onboarding workflow using standardized briefing documentation and communication templates.
- Supported community AMA (Ask-Me-Anything) sessions and communicated product features clearly to prospective partners and creators.

Quarter Life Projects | Jakarta, Indonesia (Remote)

Backend Developer (Volunteer) | January 2022 – April 2022

- Redesigned and normalized relational database schemas to improve data query structure and reduce data retrieval inconsistencies.
- Developed a multi-category Mentorship Filter feature, simplifying user search flows and accelerating mentor discovery on the platform.
- Collaborated with the product and tech team to test and debug backend features to enhance overall user platform experience.

Screening SDM Indonesia | Surabaya, Indonesia

Character Assessment Specialist — Software Development & Reporting | November 2014 – July 2017

- Developed a proprietary C# desktop software utility to automate the calculation of biographical data and candidate evaluation metrics.
- Replaced manual calculation worksheets with an automated software workflow, reducing client report preparation time.
- Gathered user requirements from assessment practitioners to refine data input forms and ensure reliable report outputs.
